Moviebox apk download kindle fire

Find good videos quickly and easily with MovieBox, a handy, no-nonsense app that lists videos categorized by genre, with poster images and plot summary. No longer searching youtube via fake or dead links, MovieBox is an interactive database of Youtube movies checked manually and verified as working in the UK. Want to watch a comedy, or horror movie, but not sure what one? Just browse these items and select one. Press play and MovieBox will open the video for you on YouTube player, it's as simple as that. There are currently 232 videos, with posters, with more added to each update. There are several kinds, including one for 3D videos, and an update coming in mid-April will add more videos. Because videos are controlled by a person, sometimes there will be videos removed from YouTube between updates, so these may appear as unavailable, this is normal. Keep in mind that these videos should be available in the US and countries outside the UK, but can only be checked as a job in the UK, so if a video isn't available in your country, be aware that this isn't the app's fault.
